

USAGI MEDICAL GROUP

Where first aid and fandom meet

UsagiMed are members of the medical community who are also convention attendees. Beyond medical training, we are familiar with the convention community and the unique challenges large and small events face in terms of con crud, convention hygiene, so many blistered feet and more. We are able to provide warm and hospitable service to your attendees because we've also been attendees. **As a separate medical group, we carry our own insurance, indemnifying both the venue and the convention so you can rest easy.**

BEFORE THE EVENT

An ounce of prevention is worth a pound of cure

TRAIN THE TRAINERS

Does your staff uniformly know how to handle [insert problem]? UsagiMed can help your crew improve their operations with fun and effective training in your con's policies, radio use, CPR, and more. We'll get everyone on the same page.

PANDEMIC POLICY

You had enough to worry about before the pandemic. We monitor health advisories from federal, state and local sources in your area and help translate it into convention policies so you don't have to add 'epidemiologist' to your collection of hats.

MASTER THE DISASTER

Have you thought about how to handle the unthinkable? UsagiMed has professional training in disaster preparedness and will work hand-in-nitrile-glove to develop a disaster plan & get everyone trained and ready.

ON-SITE SERVICES

It's showtime!

WALK-IN CLINIC

UsagiMed provides non-emergent services via our walk-in self-serve clinic. This level of care is an excellent way for any convention to show they care about their guests and attendees. UsagiMed supplies and stocks all the over-the-counter medications and supplies necessary for your event, allowing people with minor aches, pains, and blisters to better enjoy the con without going offsite or paying an arm and a leg at the gift shop.

EMERGENCY MEDICAL RESPONSE

UsagiMed is staffed by EMTs or higher. Our knowledge and experience as advanced providers allow us to properly respond to calls, know when to call for help early, and how best to support a patient until EMS arrives. General staff should not have to deal with potential health emergencies, and we are happy to take on that burden so they can focus on running the convention and having a fun time.

Let's talk about your convention! Contact Mickey Desai at mdesai@usagimed.com
